

## **TELEFLEX / PHYSICIAN CHARTING**

Once these patients finally reach you in the back you should have a partially completed note as well as a portion of the medical management completed.

You simply take over this note as if it were your own and edit it as you see fit. The story sometimes changes and that's ok. Simply edit it. There are parts of the physical exam that cannot be completed through telehealth. That is ok simply do those parts of the physical exam and document them. If you find that there are orders you would like to add please by all means add them. If there are orders that have not been completed and you want to cancel them, then cancel them.

**Finally at the bottom of the chart please place an addendum that reads: "pt visit initiated by teleflex team, pt interviewed, examined and dispositioned by me. Note edited where appropriate"**
