

November 2022 Study Sheet

[Diagnostic accuracy of neuroimaging in emergency department patients with acute vertigo or dizziness: A systematic review and meta-analysis for the guidelines for reasonable and appropriate care in the emergency department - PubMed \(nih.gov\)](#)

- Negative CT does not rule out posterior stroke

[Association of Recent Use of Non-Vitamin K Antagonist Oral Anticoagulants With Intracranial Hemorrhage Among Patients With Acute Ischemic Stroke Treated With Alteplase - PubMed \(nih.gov\)](#)

- NOAC use within 7 days of receiving tPA was not associated with a significant increase in intracranial hemorrhage

[Effect of Intravenous Fluid Treatment With a Balanced Solution vs 0.9% Saline Solution on Mortality in Critically Ill Patients: The BaSICS Randomized Clinical Trial - PubMed \(nih.gov\)](#)

- No difference between normal saline and a balanced electrolyte solution (plasma-lyte) for fluid resuscitating critically ill patients.

[Association of limited English proficiency and increased pediatric emergency department revisits - Portillo - 2021 - Academic Emergency Medicine - Wiley Online Library](#)

- Limited english proficiency is associated with increased pediatric revisits to the ED

[Tenecteplase vs. alteplase for acute ischemic stroke: a systematic review - PubMed \(nih.gov\)](#)

- This paper suggests that tenecteplase is a superior thrombolytics agent for acute ischemic stroke when compared to alteplase
