

New Laboratory Test: Vaginosis Panel [LAB9826]

Vaginosis Panel will be available to order beginning Tuesday, 6/27/2023 on patients > 14 years of age. Expected turn around time is 16 hours from collection to result.

Four separate target results are included in the Vaginosis Panel:

1. Bacterial Vaginosis (BV) detects and quantifies rRNA from bacteria associated with bacterial vaginosis, including Lactobacillus (*L.gasseri*, *L. crispatus*, and *L. jensenii*), Gardnerella vaginalis, and Atopobium vaginae. This test reports a qualitative result for BV and does not report results for individual organisms.
2. Candida species group (*C. albicans*, *C. tropicalis*, *C. parapsilosis*, *C.dubliniensis*) – each species is not differentiated in the report.
3. Candida glabrata (requires different treatment than that provided for *C. alb.*)
4. Trichomonas vaginalis

Vaginosis Panel

Test code: 123101809 Synonym: VAGINOSIS, YEAST PANEL, TRICHOMONAS PANEL Orderable procedures: VAGINOSIS PANEL [LAB9826]

Vaginosis Panel		
Res	Component	Value
1	Bacterial Vaginosis	Negative
2	Candida species group	Negative
2	Candida glabrata	Negative
1	Trichomonas vaginalis	Negative
